## EDUCATION

**Accurate Institute Of Management And Technology**

*B.Tech-Computer Science Engineering **Persuing***

**2021-\***

*Greater Noida*

INTERMEDIATE-Model School,Dalmianagar (2019-2021)

## COURSEWORK / SKILLS

- Java Full Stack Development
- SpringBoot
- Web Development
- Kafka
- Docker
- SonarQube
- ReactJs
- OS
- DBMS

## PROJECTS

**MissionOneMillion** 🚀 | **MERN**

**2024**

- The "Mission One Million" project is a collaborative effort by a diverse team of 10 members, each bringing unique skills and perspectives to the development of our Learning Management System (LMS) .
- This LMS aims to transform the educational landscape by offering an accessible, scalable, and user-friendly platform for both learners and educators.
- Designed a user-friendly interface with a focus on accessibility, ensuring that the Home, About, Services, Testimonials, and Contact sections are easy to navigate.
- The "Mission One Million" Learning Management System (LMS) is designed to provide an innovative and comprehensive online learning experience that meets the needs of a diverse audience

**MealShare** 🚀 | **MERN**

**2024**

- Developing a full-stack meal-sharing platform enabling users to share, browse, and book meal events, using React.js for the frontend and Node.js with Express.js for the backend .
- Implementing secure user authentication using JWT and a role-based access control system.
- Developing RESTful APIs for user registration, meal creation, and booking functionalities.

**Apple Website Clone** 🚀 | **Reactjs,TailwindCss2024**

**5pt**

- Developed a visually accurate clone of Apple's website using ReactJS and Tailwind CSS, focusing on component-based architecture and modern design principles
- Created reusable React components for the navigation bar, hero section, and product showcase..
- Implemented dynamic navigation between pages with React Router.
- Focused on code readability and modularity to enable future enhancements.
- Demonstrated proficiency in ReactJS and Tailwind CSS for modern web development.

**Jaehaerys** 🚀 | **HL7 FHIR, Kafka, Java, SpringBoot , Docker, Reactjs, MongoDB**

**2024**

- started Developing a platform that integrates with Electronic Health Record (EHR) systems using HL7 FHIR standards to enable seamless interoperability, data exchange, and real-time patient health monitoring.
- The project collects, processes, and displays real-time patient health data (like heart rate, blood pressure, etc.) from devices or systems
- It ensures the data is stored and shared using healthcare standards (HL7 FHIR) so hospitals or doctors can easily use it.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, Java EE, JavaScript, SQL, NoSQL, SpringBoot, JDBC, ReactJs

**Developer Tools:** VS Code, STS, Eclipse, Git, Github, Docker, IntelliJ, SonarQube, CLion

**Technologies/Frameworks:** SpringBoot, SpringBoot, Git, GitHub, ReactJS, kafka, Spark, Docker

## CERTIFICATIONS

- Java-Incapp
- Python
- Java EE
- Web Development
